

SEOUL

AceCosm is starting full services for medical tourism

It covers plastic surgery, hair transplantation, laser eye surgery, skin care and dentistry. Before you visit Korea, you can have the full consultation with experts from Korea remotely including on-line and phone/video consultation. We help our customers find the best treatment plan, the best clinics, and the best doctor for each specific case. We also take care of logistics between you and the clinic and help you while you stay in Korea. When you visit and stay here in Korea, we will ourselves welcome you by picking you up at the airport. And you don't need to worry about accommodations as well. We will prepare and offer it to you. Translation and extra care are included in this medical tourism. With your personal medical guide, you can enjoy your time in Korea. When you leave Korea, we will look for you as continued support for as long as you need us. This service covers from end to end.
